NotifyBuddy Premium MOD APK - Though this is tested on OP6T, it could be working for most Android Oreo and later phones. So I was annoyed not having an LED notification light on OnePlus 6T, so I tried to make one. As OP6T has an AMOLED display, the app brings in a black screen with notification LED-looking animation whenever the desired notification comes. To use it: 1. Disable Ambient Display and any battery optimization for the app. 2. Give notification access permission. 3. Select apps you want notifications for by choosing a color Note: On successfully selecting a color for an app, the text in which the App name is written should change to that color That's it. For MIUI 11 devices, make sure that AutoStart is enabled in App Info. Also, check "Show on lock screen" permission in other settings. Additional Features of NotifyBuddy Premium MOD APK 1. Change LED animation time. 2. Change LED colors. 3. Change LED position. 4. Notify for missed calls. 5. Change LED size (Premium required!) 6. Add Downtime (Premium required!) A Premium version can be bought within the app to unlock all features! Minor improvements and Bug fixes Premium / Paid features unlocked; Disabled / Removed unwanted Permissions + Receivers + Providers + Services; Optimized and zipaligned graphics and cleaned resources for fast load; Ads Permissions / Services / Providers removed from Android manifest; Ads links removed and invokes methods nullified; Ads layouts visibility disabled; Google Play Store install package check disabled; Debug code removed; Remove default\_source tags name of the corresponding java files; Analytics / Crashlytics / Firebase disabled; No active trackers or advertisements; AOSP compatible mode; Languages: Full Multi Languages; CPUs: universal architecture; Screen DPIs: 120dpi, 160dpi, 240dpi, 320dpi, 480dpi, 640dpi; Original package signature changed. Even though the app is tested on OP6T, it can work well on many Android Oreo phones and above. The notifications are displayed in colors at any time, via the screen on the OP6T. Applications will display notifications on a black screen, with lots of animations when there are notifications. Please download the application right away so that you will receive an LED notification on the device with every message, better notification efficiency. The operation when starting to use is effortless. Just through a few times of use, the user can master the features as well as how it works. We will also guide users in detailed steps to use the application properly for the highest efficiency. First, you need to choose which apps you need to set notifications, give the current app permission to signal an LED light when selected apps have notifications. This makes it easy for users to realize they have important news to check, quickly check the phone to see notifications and limit users' status missing vital works. Choose the light you want when making notifications, from the color of the lights, the size of the lights and the position of the LED light for announcements, the personalizations that make your device unique and personal. User can customize, edit the characteristics according to your preference. It has made a difference for the application, making it not the same in any case. All other settings in the application are allowed for users to customize everything to suit their preferences. Look in the list of applications, see if the things you need have been marked or not? Turn off the display of your surroundings, do this to optimize the battery life of your device. Save battery power to keep apps running longer. Don't forget to grant permissions for our apps so that LED lights notify our apps to the user. Finally, select the app for which you want to display and choose the announcement LED color. It is quite essential to note when you have successfully selected a color scheme for your application. With the corresponding notification light color, the text displaying the text name will be converted to the equivalent color, making it easy for users to recognize. One more thing to note is that for devices running MIUI 11, users should make sure that the "Autostart" section is enabled in the application's information. You should also carefully check the "Show on lock screen" permission to grant the right to display notifications when the screen is locked, ensuring users receive a full LED notification when other apps have notifications. Once the app is updated, many impressive highlights make users love it even more. We always try to improve the application more actively to meet the needs of our users. Apps change in terms of time with LED notifications, something that hasn't happened before. You can customize the color of the light when announcing which color you love the most, and please customize it to your preference. Users are allowed to change the LED position through the app: you can change to a new position to create freshness every time you receive a notification. When you are busy with something, you missed a call from a friend or relative, and we will immediately notify the LED light for users to know. It requires users to accept an app upgrade for more advanced features, paying an extra fee when using the app comfortably. In exchange for the upgraded version of the app, you will be able to change the notification light's size even. Add some customizations like time to deactivate apps. Upgraded versions paid for in-store purchases unlock all the greatest features, ensuring a better user experience when using the app. Nothing can stop you right now; quickly download the NotifyBuddy app to your device, experience the new and smart notifications on your device. Make the moments of receiving notifications on your phone more sparkling and exciting. We hope this application will bring users the most satisfaction and trust, hope that after using, users will appreciate the application. Once a notification goes off, a specific light and animation will accompany them. This is a fun way to always stay aware of your phone's activity at all times. In order to fully-utilize this application, you will need to make sure the AutoStart option is on. Also, make sure to check the permissions and allow your app to "Show on lock screen". These two options will enable NotifyBuddy Pro to run at full-capacity for you. How to Use NotifyBuddy Premium Using the application is fairly easy. There are only a few steps that need to be mentioned. First, you will need to disable any of your device's battery optimization options. This gives full room for NB to access your phone. Second, you will need to allow permissions. Allow the app to access certain aspects of your device if you want to continue. Third, you will need to elect any additional apps that you want to combine with this tool. What applications on your device do you want to have LED light notifications? You're free to choose. What Else Can You Do? Not only are you able to add various LED lights, but there are still different features available in NotifyBuddy Premium for Android. For instance, you will be able to change the specific animation associated with an app. Of course, colors are a huge detail to manage. So, changing colors should already be an obvious option available to users. That's not all, positions can also be edited within the application. Also, you can choose whether or not to get a second notification if you receive a missed call from somebody. Premium Features There are two premium features that are added onto the application. One, you will be able to change the LED size on your device. Two, you can add a downtime for your LED light and animation. These two additional features might not be worth spending the extra money. But, that's why we have the next section... NotifyBuddy Premium APK Free Download Just download and install the NotifyBuddy Premium APK latest version to your Android!
