Having said that, we would love to hear your opinions and incorporate them in the roadmap if suitable. There are multiple ways to develop applications for the android; you can go down the path of hybrid application development where flutter, react-native, or NativeScript are the most common contenders. Flutter uses Dart, whereas React Native and Native Script rely on JavaScript. Answering the question of hybrid vs native is out of the scope of this roadmap. This roadmap is focused on the native Android apps development but if you are interested in learning any hybrid framework, my personal preference is react-native and I would recommend you to checkout the Frontend Developer Roadmap. Complete Roadmap Here is the full version of the roadmap in a single image and after that we have the broken down version with the resources and links to learn more about each of the boxes.
